Mizrahi Tops The Charts For The Sixth Year In A Row!

By Britni Olsen-Kovalenko

Designed to recognize and award the sires producing the most successful offspring in the show ring, the Saddle Horse Report Breeders' Report is in its 14th year of recording. It is an invaluable resource for anyone who studies bloodlines. Whether you are a new breeder seeking a successful cross or a prospective buyer looking for a horse in a particular division, this report honors an elite group of top ten sires with offspring in the show ring for 2019.

As we gather more data each year, a trend of consistency has become more noticeable. Mizrahi has maintained the top position for the last six years and his results have been outstanding. He led the pack by over 1,100 points ahead of his closest rival, the reserve position winner, Minion Millennium.

When reviewing results for each stallion, there are a few things to bear in mind. The total number of points is dependent on how many get are showing and how many classes they show in. The average number of points per get (APG) is very important. There are several sires who have relatively few recorded offspring but who have achieved a high number of average points per get (APG); in other words, the offspring are excelling in their divisions. Town Assets, for example, placed eighth in the top ten with only 23 get, but has an average points per get of 111.2, the highest average points per get (APG) among the top ten sires.

We not only calculate which sire has the best overall results, we also break the data down by division and by category within that division. We score double points for regional shows and triple points for the Grand National and World Championship Morgan Horse Show. It is also important to understand how the points were earned. A park horse, for example, may be shown lightly and have a lower score but a sport horse, who may show in a lot of classes, will tend to have a higher score. This observation is not to diminish either of their achievements but rather to provide a better understanding of what is behind the raw numbers. What we cannot measure, however, is the indefinable star quality that shines through in the ring and that, perhaps, is the secret to greatness.

Additional detail for each horse featured here can be found in the results section of the Saddle Horse Report website at www.SaddleHorseReport.com.

Our readers may also be interested in a specific category within a division (for example, amateur western pleasure horses). This information can be found in the Top Two Divisional Sires report in this article. While the top positions are mostly held by our top ten stallions, there are other sires producing gifted offspring within a given category.
