Each year the Morgan industry's breeders dedicate their efforts to producing the next generation of top show ring competitors. To assist in their breeding process, Saddle Horse Report is proud to bring you its annual Breeders' Report, in its 16th year in recording. The Report has become an invaluable resource for horse enthusiasts and those interested in the bloodlines of a particular entry, as it highlights an elite group of stallions. These sires were well represented by their get in a myriad of divisions at horse shows across the country throughout the last show season. It is our hope that this report will guide breeders to find the best crosses for their mares as they further their breeding programs.

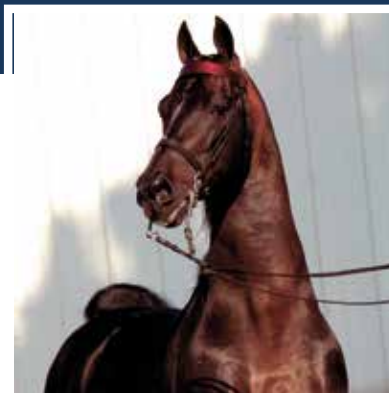

It is important to note the different variables that are considered when calculating the results for each stallion that lands a spot on the Breeders' Report. The total number of points awarded is dependent on how many offspring showed and how many classes they showed in. The average number of points per get or APG additionally plays an important role as it increases when offspring excel in their respective division.
